Project Title: Spider-Man: Into the Spider Verse

I plan on making a multi-page website, starting off with a big home page and a navigation bar with information tabs at the top. My visual imagery will come from and match the style of the movie.

- **Home Page/Introduction** – Introduce the movie title alongside a summary of what the website will go over and the impact of the movie

- **Plot** – Describe the plot of the movie

- **Cast** – Introduce the voice cast alongside the characters (with images)

- **Production** – Go through the main stages that led to the creation of the movie
    - **Development/Writing** – Describe how the script was written and why they chose to develop this even though six other Spider-Man films already exist
    - **Music** – List the soundtrack (with an option to play the music?)

- **Animation and Design** – Focus on this category in particular since it is one of the main reasons this film was acclaimed (even though it's technically part of the production process) (include lots of images)
